RESEARCH INTEREST

As an enthusiastic researcher, I am passionate about harnessing advanced computational techniques to unveil the biological mechanisms hidden within **high-throughput sequencing and high-content imaging data**, with a specific focus on image-based spatial profiling. My present work primarily centers around the development of cutting-edge **deep learning** models tailored to image-based spatial omics data ([Jin et al.](#), RECOMB2023, wrapping up) and the analysis of **temporal perturbation patterns** in single-cell experiments ([Jin et al.](#), Briefings in Bioinformatics, 2022). My commitment extends to active involvement in the experimental **design of spatial multi-omics experiments**, and I possess a wealth of experience in exploring single cell data across various biological systems and diseases, including HLHS ([Xu, Jin et al.](#), Cell Stem Cell, 2022), schizophrenia ([Sebastian*, Jin* et al.](#), Nature Communications, 2023), among others.

I am particularly interested in cutting-edge bioengineering innovations, such as image-based spatial transcriptomics and optical molecular recording. Collaborating with Dr. Jian Shu, we are devotedly developing innovative methods for in-situ molecular recording through microscopy.

With expertise in computational biology and a strong interest in bioengineering, my ultimate goal is to advance our understanding of neuroscience and cancer biology by implementing cutting-edge computational methods with emerging new molecular recording technologies.

EDUCATION

Massachusetts General Hospital, Harvard Medical School, Boston, USA	Visiting Student	2022-Present
Cincinnati Children's Hospital, Cincinnati, USA	Ph.D. in Biomedical Informatics	2018-Present
Zhejiang University, Hangzhou, China	B.Sc. in Biology	2014-2018

RESEARCH EXPERIENCE

Massachusetts General Hospital, Harvard Medical School	2022/05-Present
<u>Visiting student in Dr. Jian Shu's lab</u>	
<ul style="list-style-type: none">Developed transfer learning model for segmentation and cell annotation in image-based spatial transcriptomics data.Image processing for STARmap data in Placenta; Experiment design for in-situ recording of cancer genomics and interaction with the environment.	
Department of Biomedical Informatics, Cincinnati Children's Hospital	2018/09-Present
<u>Ph.D. student in Dr. Bruce Aronow's lab</u>	
<ul style="list-style-type: none">Developed CellDrift, a generalized linear model to analyze single cell perturbation effects. Applied functional data analysis (FDA) to infer temporal perturbational patterns.Interrogated temporal impact of NRXN1 deletion in schizophrenia patients using single-cell data from patient-derived brain organoids.Analyzed single cell data of human hepatoblastoma and mouse xenograft tumors. Identified tumor clusters with distinct transcriptional profiles.Developed ToppCell, a hierarchical differential analysis framework for single cell datasets with complex metadata. Constructed gene signature atlases for COVID-19 patients and multiple human tissues, including lung, brain, GI, and others.	

Institute of Pharmaceutical Biotechnology, Zhejiang University

2016/11-2018/07

Undergraduate Student in Dr. Xin Chen's lab

- Benchmarked Gene Set Linkage Analysis (GSLA), a gene set annotation tool in Arabidopsis.
- Participated in the design of decision support system for cancer patients based on gene mutations and transcriptional levels.

Department of Life Science, Zhejiang University

2015/07-2016/10

Undergraduate Student in Dr. Jun Chen's lab

- Selected scoliosis zebrafishes with genetic mutations. Used CRISPR technology in zebrafishes with double gRNAs to knock in long DNA fragments with higher precision and specificity.

SKILLS

Programming: Python, PyTorch, R, Pyro, Linux shell

Skills: Imaging Processing, Deep learning, Probabilistic modeling, Single-cell analysis, Cloud computing

AWARDS

Second Place, Best Poster Award, ISMB 2022 (SysMod Meeting)	2022
Second Place, Graduate Student Research Forum (GSRF), University of Cincinnati,	2020
Best Application Award, Zhejiang Bioinformatics Competition	2017
China National Award (1.8%)	2017
First Prize Scholarship for Excellent Students, Zhejiang University	2017
Tang Lixin Scholarship for Excellent Model Student	2017
Zhejiang Provincial Government Scholarship	2016
Second Prize, Physics Innovation Competition in Zhejiang Province	2015
